COMPANY BACKGROUND

Established in 2015, our company was founded by a team of distinguished artificial intelligence experts from the United States. Over the past decade, we have dedicated ourselves to the intelligent health sector, applying a rigorous scientific approach to our research and development. Our commitment has yielded remarkable achievements, particularly in the field of breast health assessment and detection.

Our primary focus is on harnessing AI technology to enhance the precision and efficiency of breast health evaluations. By integrating a robust IT infrastructure with advanced image analysis techniques, our systems can intelligently and instantaneously identify potential risk areas in breast imagery. This pioneering technology has been awarded a national invention patent and delivers accuracy comparable to that of leading medical professionals.

Our flagship product, the "Dr. J" Breast Health Intelligent Assessment System, epitomizes our innovative spirit. This comprehensive solution, combining both hardware and software, utilizes state-of-the-art AI to offer an unprecedented level of breast health management. "Dr. J" has revolutionized traditional beauty and wellness services, enabling providers to offer precise, personalized health assessments and preventive care with unparalleled efficiency. This breakthrough not only elevates service quality but also significantly enhances the operational capabilities of the women's health and beauty industry.

CORE STRENGTHS

01 Advanced

Cutting-edge AI Image Recognition Technology: Provides precise breast health assessments, significantly enhancing customer trust and loyalty.

02 Safety

Non-invasive, Painless, and Radiation-free: Ensures an exceptional user experience with easy-to-learn, safe, and reliable operation, supporting rapid deployment and service.

03 Convenient

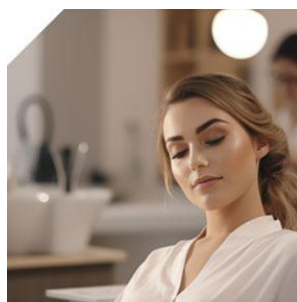

Compact and Portable: Convenient to carry, setting a new trend in health management and preventive care.

04 User-friendly

Simple Interface with Clear Processes: Easy to learn and use, with full-process monitoring for standardized and high-quality detection.

5 KEY FUNCTIONAL ADVANTAGES

- Automated Detection and Annotation of suspicious Risk Areas
- Automated Calculation of suspicious Risk Area Size
- Automated Breast Health Classification
- Automated Monitoring Operational Methods
- Automated Generation of "Breast Health Intelligent Assessment Report"

HOW TO USE

- 1 Start Dr. J
- 2 Connect the Data Collection Device
- 3 Collect Target Area Image Data
- 4 Turn on Automatic Analysis
- 5 Generate Report

APPLICATION SCENARIOS

Early Assessment to Mitigate Legal Risks

Before offering services, use "Dr. J" to evaluate clients' breast health. Should any risks be identified, direct the client towards appropriate medical care to preempt any potential legal issues.

Ongoing Care and Monitoring for Tailored Wellness

"Dr. J" identifies and targets areas of concern, providing specialized care that promptly addresses health issues and aids in maintaining a graceful figure.

Continuous Engagement: Balancing Aesthetics and Wellness

Regular sessions with "Dr. J" help monitor ongoing conditions, offer timely advice, refine treatment plans, and improve overall health management, thereby building deeper trust with clients.
